

| Model | Description | Gain (dBi) | Dimensions (mm) | Price (EUR) |
|---|--|------------|-----------------|--------------|
| Omnidirectional antenna with Horizontal polarization for WiFi | | | | |
| DVM10-H360a | The omnidirectional antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) – with horizontal polarization. RSMA or N (female) panel connector. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 10 | 110 x 350 | 58,84 |
| DVM14-H360a PRO | The super high gain omnidirectional antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) – with horizontal polarization. RSMA or N (female) panel connector. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 14 | 110 x 510 | 88,30 |
| Sector antennas & clusters with Horizontal polarization for WiFi | | | | |
| DSM13-H180/1a | The single sector antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 180° @ -6 dB. RSMA or N (female) panel connector. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 13 | 110 x 350 | 50,43 |
| DSM17-H180/1a PRO | The super high gain single sector antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 180° @ -6 dB. RSMA or N (female) panel connector. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 17 | 110 x 510 | 65,57 |
| DSM13-H180/2a | The 2 independent sector antennas in 1 enclosure – cluster - (5,470-5,725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 180° @ -6 dB. RSMA or N (female) 2 panel connectors. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 13 | 110 x 350 | 64,45 |
| DSM17-H180/2a PRO | The 2 independent super high gain sector antennas in 1 enclosure – cluster - (5,470-5,725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 180° @ -6 dB. RSMA or N (female) 2 panel connectors. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 17 | 110 x 510 | 83,82 |
| DSM16-H90/1a | The single sector antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 90° @ -6 dB. RSMA or N (female) panel connector. Down tilt up to 5° at 90° sector is possible to setup from bottom side of the antenna quite individually. | 16 | 110 x 350 | 28,00 |
| DSM20-H90/1a PRO | The super high gain single sector antenna (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 90° @ -6 dB. RSMA or N (female) panel connector. Down tilt up to 3° at 90° sector is possible to setup from bottom side of the antenna quite individually. | 20 | 110 x 510 | 36,41 |
| DSM16-H90/2Aa | The 2 independent sector antennas in 1 enclosure – cluster - (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 90° @ -6 dB, the sectors are placed side-by-side. RSMA or N (female) 2 panel connectors. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 16 | 110 x 350 | 47,62 |

| | | | | |
|---|--|--------|-----------|---------------|
| DSM20-H90/2Aa PRO | The 2 independent super high gain sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 90° @ -6 dB, the sectors are placed side-by-side. RSMA or N (female) 2 panel connectors. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 20 | 110 x 350 | 61,95 |
| DSM16-H90/2Ba | The 2 independent sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 90° @ -6 dB, the sectors are placed at opposite sides. RSMA or N (female) 2 panel connectors. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 16 | 110 x 350 | 47,62 |
| DSM20-H90/2Ba PRO | The 2 independent super high gain sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 2x 90° @ -6 dB, the sectors are placed at opposite sides. RSMA or N (female) 2 panel connectors. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 2 x 20 | 110 x 510 | 61,95 |
| DSM16-H90/3a | The 3 independent sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 3x 90° @ -6 dB. RSMA or N (female) 3 panel connectors. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 3 x 16 | 110 x 350 | 56,04 |
| DSM20-H90/3a PRO | The 3 independent super high gain sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 3x 90° @ -6 dB. RSMA or N (female) 3 panel connectors. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 3 x 20 | 110 x 510 | 72,86 |
| DSM16-H90/4a | The 4 independent sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 4x 90° @ -6 dB. RSMA or N (female) 4 panel connectors. Down tilt up to 5° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 4 x 16 | 110 x 350 | 70,05 |
| DSM20-H90/4a | The 4 independent super high gain sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 4x 90° @ -6 dB. RSMA or N (female) 4 panel connectors. Down tilt up to 3° at every 90° sector is possible to setup from bottom side of the antenna quite individually. | 4 x 20 | 110 x 510 | 91,11 |
| DSM16-H90/6a | The 6 independent sector antennas in 1 enclosure -cluster- (5.470-5.725 GHz or other 5GHz band - 802.11a) with horizontal polarization, main lobe in horizontal plane 6x 90° @ -6 dB. RSMA 6 panel connectors. Antennas inside are arranged in 2 floors. | 6 x 16 | 110 x 680 | 160,90 |
| Accessories | | | | |
| AT | The antenna accessories – mounting bracket for DVM & DSM antennas | | | 6,99 |
| Typical values of VSWR are 1.2-1.3. Maximum value of VSWR is 1.5:1. The prices do not include the Tax. The prices are to be understood in EUR, EXW (Incoterms). The warranty of the products: 24 months. For our customers we offer a discount which depends on amounts of goods. | | | | |
